Summary

Detail-oriented developer with skills in Java, MongoDB, and React.js, and developing proficiency in Spring Boot. Experienced in creating secure, scalable applications and REST APIs through academic and personal projects. Strong foundation in backend development, authentication systems, and full-stack web solutions. Actively engaged in open-source contributions and problem-solving on LeetCode and GeeksforGeeks.

Education

Master of Computer Application

Sharda University, Uttar Pradesh

PG: 2026

CGPA: 9.22 / 10

Bachelor of Computer Application

JIS College of Engineering, West Bengal

UG: 2024

CGPA: 8.14 / 10

Projects

EchoSafe Journal | Java, Spring Boot - Backend

Jan 2025 – Jun 2025

- Architected and implemented a **Spring Boot backend with MongoDB**, applying **RESTful** microservices principles to ensure scalability and high availability.
- Developed and enforced JSON Web Token (JWT) & OAuth2 authentication and role-based access control using **Spring Security**.
- Designed, documented, and validated **RESTful APIs** with **JUnit** testing to guarantee scalability, reliability, and maintainability.
- Configured deployment-ready builds with environment-specific properties for seamless integration into **cloud hosting environments**.

SimpleSol Hub | PHP - Full Stack

Jun 2024

- Developed a **full-stack event-hosting platform (PHP, MySQL, JavaScript)**, with role-based access, responsive UI, and **MVC design pattern**, enhancing scalability and usability.
- Implemented end-to-end modules for event creation, registration workflows, interest tracking, and role-based access management to enhance functionality.
- Integrated dynamic scheduling, real-time event updates, and interactive admin dashboards to improve usability and operational efficiency.
- Optimized backend queries and client-side rendering to improve application **performance, scalability**, and user experience under high concurrency.

ContactVault | NodeJs, MongoDB, Express - Backend

Mar 2025

- Built a **RESTful backend with Node.js, Express.js, and MongoDB**, delivering secure Create, Read, Update, Delete (CRUD) operations and optimized **NoSQL queries** for faster response times.
- Implemented JWT-based authentication and role-based access control Role-Based Access Control (RBAC) to ensure data security and user privacy.
- Optimized database queries and API response times by applying indexing, aggregation pipelines, and efficient middleware design.
- Designed the backend for seamless frontend integration, enabling scalability, maintainability, and cross-platform compatibility.

Technical Skills

- **Languages:** Java, C, C++, Python, SQL, Dart
- **Frameworks & Libraries:** Spring Boot, Node.js, React.js, Express.js, Flutter
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Git, GitHub, PowerBI, Postman, IntelliJ IDEA, VS Code

Certifications

- **Flutter Training** (Cross-Platform Mobile Development) - Ainwik Infotech & Sharda University — March 2025 – April 2025 
- **AI: Transformative Learning with TechSaksham** - TechSaksham — 2025 
- **Python Pro Bootcamp** - Udemy — 2024 
- **Mastering in C** - Udemy — 2022
