Summary

Data Analyst with strong skills in SQL, Python, and Power BI, experienced in transforming raw data into meaningful insights. Proficient in data cleaning, visualization, and exploratory data analysis (EDA) to support data-driven decision-making. Passionate about solving real-world business problems using analytical thinking and structured data approaches.

Education

Master of Computer Application

Sharda University, Uttar Pradesh

PG: 2026

CGPA: 9.12 / 10

Bachelor of Computer Application

JIS College of Engineering, West Bengal

UG: 2024

CGPA: 8.14 / 10

Projects

Air Quality Analysis & Forecasting Dashboard | Python, Flask, LSTM

Jan 2026– Mar 2026

- Developed a web-based air quality monitoring system integrating real-time environmental data using APIs to track AQI and pollutant levels (PM2.5, PM10, NO₂, CO, O₃).
- Performed data cleaning and exploratory data analysis (EDA) using **Pandas and NumPy** to clean, transform, and analyze air quality datasets.
- Built a **LSTM-based deep learning model** to forecast PM2.5 levels for the next 24 hours, enabling predictive analysis of pollution trends.
- Designed interactive dashboards using **Flask and Chart.js** to visualize pollution trends and support data-driven insights.

Business Sales Analysis & Profitability Dashboard | Power BI

Dec 2025

- Developed an interactive **Power BI dashboard** analyzing **2.3M+ sales data**, including KPIs such as sales, profit, and quantity across cities, categories, and time trends.
- Performed data cleaning and transformation using **Power Query** and created calculated metrics such as **profit margin and sales trends**.
- Identified key business insights, including **top-performing categories, seasonal profit patterns, and high-revenue regions** to support data-driven decision-making.

EchoSafe Journal | Java, Spring Boot (Backend)

Jan 2025 – Jun 2025

- Architected and implemented a **Spring Boot backend with MongoDB**, applying **RESTful microservices principles** to ensure scalability and high availability.
- Developed secure authentication using **JWT & OAuth2** and implemented **role-based access control** with Spring Security.
- Designed, documented, and tested **RESTful APIs** using **JUnit**, ensuring reliability and maintainability.

Technical Skills

- **Data Analysis & Visualization:** Power BI, Microsoft Excel
- **Programming & Query Languages:** Python (Pandas, NumPy), SQL
- **Data Techniques:** Data Cleaning, Data Transformation, Exploratory Data Analysis (EDA), Data Visualization
- **Databases:** MySQL, MongoDB
- **Tools & Platforms:** Google Collab, Git, GitHub, VS Code, Postman

Certifications

- **Data Visualization using Power BI** - Sharda Informatics — May–June 2025 
- **Prompt Engineering** - Sharda Informatics — Jan–April 2025 
- **AI: Transformative Learning with TechSaksham** - TechSaksham — 2025 
- **Python Pro Bootcamp** - Udemy — 2024 
- **Mastering in C** - Udemy — 2022
